On December 15, 2021, CBO replaced the estimate that was transmitted on December 10, 2021. In the previous version, the estimate overstated amounts that were available for rescission under section 12102 by \$150 million. Thus, the estimated cost of title I was understated by that amount.

Budget authority reflects appropriations specifically provided in title I or amounts estimated by CBO.

The costs of title I fall within budget functions 270 (energy), 300 (natural resources and environment), 350 (agriculture), 450 (community and regional development), and 600 (income security).

The Budget Control Act of 2011 (BCA) requires the annual sequestration of nonexempt mandatory spending programs. The Office of Management and Budget determines which accounts are subject to reductions under the BCA. Some of the accounts affected by title I are subject to sequestration; this estimate reflects the effects of sequestration on those accounts.

Title I would not increase on-budget deficits after 2031.

Title I contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act.
